**DIGITAL TESTING**

Practice Quick Start Guide

Prepare for the SAT in 10 Simple Steps:

1. Download **Bluebook™** and get access to full-length practice tests from the makers of the SAT®. You can log in using a sign-in ticket from your school or a personal College Board student account, if you have one.

2. On the Bluebook homepage, navigate to **Full-Length Practice** under Practice and Prepare. You can also select **Test Preview** to get a peek at the app's built-in tools and familiarize yourself for test day. Resume a practice test you've already started from here.
3. Select your **Test Type** and **Practice Test** from the dropdown menus available. If you plan on testing with accommodations, select the switch next to "I will be testing with accommodations" to apply them to your practice test.

Then, select which accommodations you want to apply to your practice test.

Accommodations

[Why don't I see my accommodation listed here?](#)

If you're approved to take the SAT with a paper test book accommodation, your practice tests are available on our website at **satsuite.collegeboard.org/practice/practice-tests**. If you require printed braille materials on test day, contact SSD customer support for a braille practice option by emailing **ssd@info.collegeboard.org** or by calling 844-255-7728. Learn more about accommodations and how to request them before test day at **accommodations.collegeboard.org**.

NOTE: *While anyone is welcome to use our accommodated practice tests, using these practice materials does not mean you have been approved to test with a particular accommodation.*
4. Follow the onscreen instructions as indicated below, then start practicing! We recommend taking at least 1 practice test with the timer and allowing for breaks as you would on test day. However, you can practice your way, pause as needed, and, when you're ready to resume practice, pick up right where you left off.

We're Preparing Your Practice Test

This may take up to a minute. Please don't refresh this page or quit the app.

5. During the practice test, use the Bluebook built-in tools previously mentioned in step 2. You'll find **Mark for Review** and **Answer Strikeout** on the questions themselves. The rest of the tools can be found in the top right corner. You'll see icons for a **Built-In Graphing Calculator** and **Reference Sheets**, as well as a **More** option that includes a **Highlights** and **Notes** tool.

6. After you complete the practice test, click **View Your Score**.

You're All Finished!

Congratulations on completing a full-length practice test. Your scores will be available on **mypractice.cb.org**.
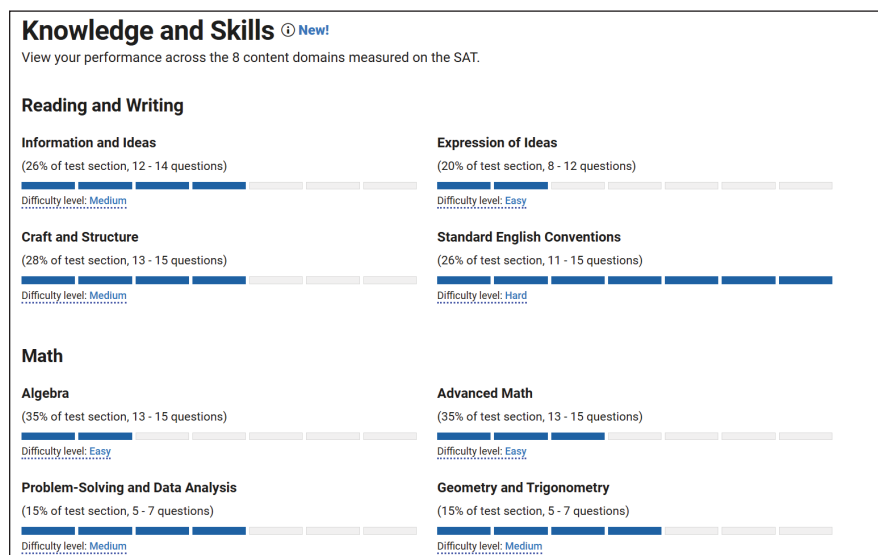

View Your Score

7. Sign in to **My Practice** using the same login credentials you used for Bluebook to retrieve your scores.

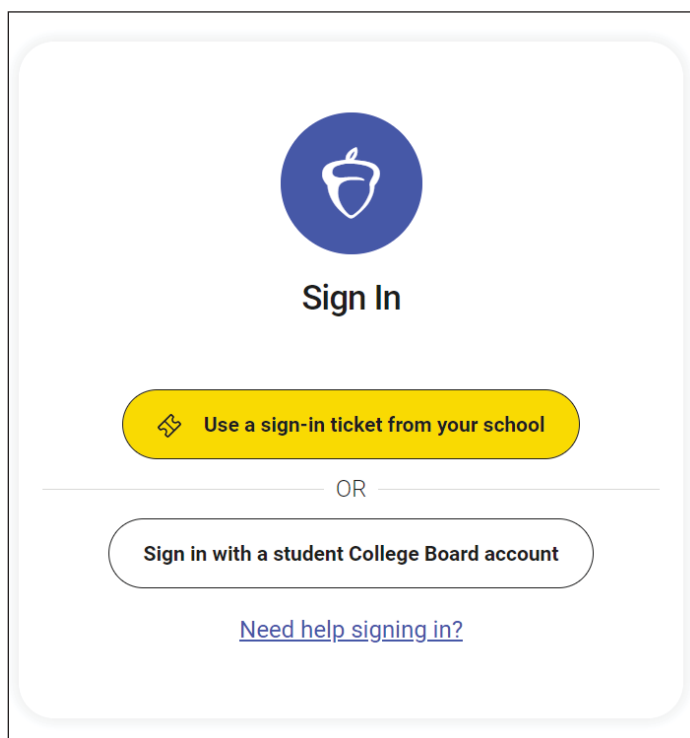

8. Once on My Practice, review your scores. Then, select **Score Details**.
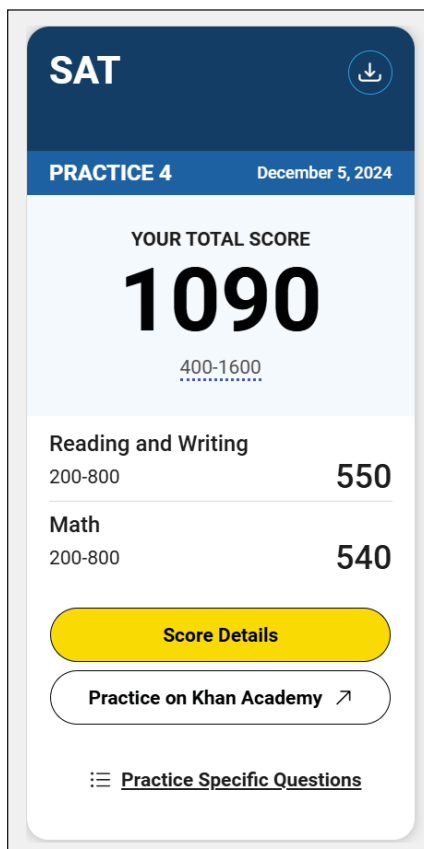

9. On the Score Details page, you'll see information on how many questions you answered correctly for each of the Knowledge and Skills Domains measured on the test. To get the most out of your practice tests, review your answers, the correct answers, and explanations under **Review All Questions**. You can also view a set of **Practice Specific Questions**, which My Practice will generate for you based on the results of your practice test to provide additional review in the areas where you have the greatest opportunities for improvement.

Knowledge and Skills ⓘ **New!**

View your performance across the 8 content domains measured on the SAT.
